Established in 2005, the company's primary goal is to help their community save money with cheap electricity by providing the best electricity service for both businesses and homes. All of Payless Power's plans focus on meeting prepayment or post-payment budget and needs of Texans all over the state. For example, regardless of credit history, Payless Power allows bi-weekly, weekly, and more prepayment options. Primarily a family owned business, three brothers, a management team and staff operate Payless Power. With a combined 50 years of prepaid retail industry experience, the company has significant expertise in areas including: Risk Management Operations Wholesale Supply Acquisition Regulations (regarding electricity market) Electric Rates and Plans Real-time electric rates and plans coming soon. In the meantime, use our search form above! Payless Provider Reviews Coming soon! *** One of the biggest differences between Payless Power and other retail electricity providers is that the company offers its customer's cash flow flexibility. They achieve this by providing pay-as-you-go, no deposit electricity. This kind of electricity plan is similar to pre-paid calling cards. For example, when you purchase a pre-paid calling card, you need to pay upfront for the number of talk minutes you want to use. Let's say that you pay \$50 for 200 local minutes. When you start using your calling card, you can use up that \$50 and 200 minutes. If you want to top-up your balance, you can buy another calling card and pre-pay for more minutes. Pay-as-you-go electricity works in the same way. You can sign-up with Payless Power for \$40, which automatically sets you up to start consuming electricity. As you use electricity, your balance is updated in real-time. When you need to top-up your balance for more electricity, the plan allows you to do so quickly and easily from an online portal (or in alternative ways). The company monitors electricity consumption using smart meters. These smart meters help to determine the pre-paid amount from the customer's account. Pre-paid electricity is just another term Payless Power uses for pay-as-you-go electricity. Smart meters also let customers know exactly how much electricity they've used at any point during the billing month. This helps the customer to determine how much they use on a daily basis in order to reduce cost. This information is automatically sent to the customer via text or email. The information within these messages includes, Number of kWh used Date of usage Remaining balance Cost for kWh used Number of days prior to required payment Post-Paid Electricity This service is not yet available, however Payless Power hopes to offer it to customers soon. Post-paid Electricity quite simply defines the way that most electricity providers offer electricity services. First the customer consumes the electricity, and then they are billed for their consumption at the end of the month. For Payless Power customers post-paid service and plans include: Once a month billing Rates per kWh Low monthly rates Many payment options Free same day connection No deposit \$0 money down (with approved credit) Payless Power's unique compared to other retail electricity providers because their customer's aren't required to provide very much information about themselves. In fact, customers get a few things when they signup with Payless Power, including: Automatic approval — no deposit required Customer service Average rate paid outline in end-of-month statement Same day connection without any extra charges Balance and usage notifications via email, text or both (daily) Less information is required from a customer due to nature of pre-paid, pay-as-you-go electricity. Commercial Electricity In addition to homes, Payless Power also offers electricity related services to businesses. Plans are similar to what is offered to residential customers, however differ in terms of rate and terms, as commercial consumers tend to need and use much more electricity. If you are confused about who to choose as your electricity provider, then you have landed at the right place. Deregulated markets can have several different energy providers in any given region, giving consumers options for where they want their energy to come from. For example, an individual can look at all the energy suppliers available in their region to see which one has the lowest prices. But, it would help if you looked out for many factors while choosing it. Electricity providers in my area can give you detailed information about how they generate their electricity or purchase their wholesale electricity and gas. You, as a consumer, can see this information and then make informed decisions about spending your money to meet your energy demands. You can choose Payless Power as your provider for a reliable and affordable power plan. Payless Power believes everyone should have access to electricity. Payless Power is a retail electric service provider serving most Texas deregulated electricity markets. In Fort Worth, Texas, Payless Power is a trading name for Young Energy. We focus on providing prepaid electric service to Texas residential customers. Payless Electricity is a certified member of the Better Business Bureau and maintains an A+ rating with that organization. Payless Power electricity provider offers affordable and reliable plans focusing on Prepaid plans. We believe everyone should have access to electricity in Texas, regardless of their income level. Payless offers easy-to-understand plans with no hidden fees, and most do not require a credit check for electric service. We allow you to keep track of your electricity plans and usage status with daily text or emails with advanced technology. You can feel secure knowing Payless Power is one of the best and cheapest electric companies. Payless Power offers reliable and affordable power with a focus on Prepaid electricity plans so everyone can have affordable electricity in Texas, regardless of their credit history or income level. Payless offers simple to understand plans with no hidden fees and most do not require a credit check for electric service. With fantastic technology that allows you to check your plans and usage status with daily text or emails - you can feel secure knowing Payless Power will be there for you. Payless Power Rates and Plans Payless Power offers a reliable and affordable Premier 12 electric rate plan. As a trustworthy electricity provider, we also provide a variation of this plan that includes a monthly promotional credit. The Payless Power plans operate similar to a reloadable calling card or prepaid cell phone. For availing of our services, the customer must have a smart meter and access to email or a text-enabled cell phone. The customer establishes an opening balance at their account. Then, they will receive a daily email and/or text message from the power supplier detailing how much money is in their account, their daily energy consumption rate, and how many days of service remain before they need to recharge their replenished account. For an informed decision, you can also do the technique of comparing electricity rates. You can also compare rates on Electricity Match. The customer can recharge their Payless Power account online, by phone, or in-person at a MoneyGram pay station (including Wal-Mart, CVS, and many other locations). Remember that we only accept cash, money orders, cashier's checks, debit cards, or credit cards for payment. Personal checks are not accepted. The customer also receives a monthly Statement of Usage and Payment. If you choose Payless power as your electricity provider, you will get a transparent overview of usage, billing, and payments for the prior month. Payless Power is a retail electric provider serving most Texas deregulated electricity markets. Based in Fort Worth, Texas, Payless Power is a trade name for Young Energy. Payless focuses on providing prepaid electric service to Texas residential customers. Payless Electricity is a certified member of the Better Business Bureau and maintains an A+ rating with that organization. How To Setup Service With Payless Power? Payless Power is one of the best electric suppliers. Our Easy Choice plan operates as a variable rate electricity product. There is no term, credit, or ID check required, and you don't have to pay a deposit to establish service. While it may seem unusual for a retail electric provider to offer only prepaid electric plans, this is a highly specialized plan. Payless has established itself as a leader for Texas prepaid electricity like other Txu energy plans. For customers with poor credit, bad credit, or similar issues, prepaid electric service is ideal for getting affordable electricity for their homes. You can contact us to avail services and to know our plans. Lowest Rate Plans Worried about your budget? We believe that electricity should be accessible to everyone. Payless Power has the cheapest rate plans for those with less budget. If you have been searching for the lowest rates, Payless Power has stated intentions of offering commercial electric service, they only serve residential customers at this time. Similarly, Payless is developing postpaid electric plans but currently offers only prepaid electric service. This specialization allows the company to focus its marketing and operations efforts and excel at serving the residential prepaid electricity market. Payless Power offers a variation of this plan that includes a promotional monthly credit. The Payless Power plans operate similar to a reloadable calling card or prepaid cell phone. A customer is required to have a smart meter and access to email or a text-enabled cell phone. The customer establishes an opening balance for their account. Then will receive daily email and/or text message from Payless Power detailing how much money is in their account, daily energy consumption rate, and how many days of service remain before they need to recharge their account to be replenished. The customer can recharge their Payless Power account online, by phone, or in person at a MoneyGram pay station (including Wal-Mart, CVS, and many other locations). Payless only accepts cash, money orders, cashier's checks, debit cards or credit cards. Personal checks are not accepted. The customer also receives a monthly Statement of Usage and Payment giving them a transparent overview of usage, billing, and payments for the prior month. Payless Power's Easy Choice plan operates as a variable rate electricity product. There is no term, no credit check, or ID check required and you don't have to pay a deposit to establish service. While it may seem unusual for a retail electric provider to essentially offer only prepaid electric plans, this is a highly specialized plan and Payless has established itself as leader for Texas prepaid electricity. For customers with poor credit, bad credit, or similar issues, prepaid electric service is an ideal way to get affordable electricity for their home. Payless Power serves customers in the Oncor, Centerpoint, AEP Texas Central (CPL), and AEP Texas North (WTU) areas. Payless maintains a U.S.-based customer call center. The call center is available for customers Monday thru Friday from 9 am to 6 pm and Saturday from 9 am to 3 pm. To contact Payless Power customer service - Call - 1-877-296-6922 How To Pick The Right Payless Power Electricity Plans? Finding the electricity plan can be an overwhelming process. While choosing an electricity provider who offers plans with low rates without seeing the other details can give you a bad situation in the long run. Choosing the right plan is essential based on your usage first and your budget to select the right Payless Power plan. Understanding your usage and budget will help you in making an informed decision. If you are looking for an electric provider and supplier near me, switch to Payless Power. Why Choose Our Services? Texas electricity ratesCalculate your energy consumptionHow to set up service Picking a planMoving in TexasDifferent types of rates Payless Power, by Young Energy LLC, is a retail electric provider based in Fort Worth, Texas and is one of over 70 registered retail electric providers in Texas. Scroll (or swipe) down for details on the Payless Power rates & plans available, the Payless Power number for customer service, and Payless Power reviews in Texas. Discover what the Payless Power login and App have to offer and ways to make a Payless Power bill payment. Payless Power - Electric company & provider service areas in Texas Payless Power is one of a few doing-business-as names that are registered by Young Energy LLC. Young Energy LLC opened to the deregulated Texas retail electric market in 2005 to provide electric service across all deregulated areas, and currently only operates under the Payless Power name. Mio Electric, PAGA MENOS, Neo Electricity, and UNO ENERGY (Young Energy's other registered dba's) are seemingly only registered names and not plan-offering electric providers. Texas residents can sign-up with a Payless Power energy plan who live within the deregulated electric utility company service areas, which include: Oncor Electric Delivery CenterPoint Energy AEP Texas (North & Central) Texas-New Mexico Power (TNMP) The "delivery fees" that are charged by each utility company are passed through to Payless Power customers (a standard practice for electric providers). The current utility company rates are: Utility company tariffs in Texas : MARCH 30 2021 TDU TDU monthly base fee TDU €/kWh energy rate AEP North \$3.57/mo 3.0078€/kWh Oncor Electric Delivery \$3.42/mo 3.4928€/kWh CenterPoint \$4.39/mo 3.2669€/kWh AEP Central \$4.27/mo 3.7458€/kWh TNMP \$7.85/mo 4.0403€/kWh Payless Power is quite consistent at offering a basic selection of Payless Power plans across Texas. For example, Payless Power Fort Worth (76118) and Dallas will have very similar electric plan products as Payless Power Houston. Payless Power customers are offered an account management portal using the MyAccount, Payless Power login platform. In MyAccount, customers are able to: Set up (or update) Auto Pay for more efficient, on-time monthly payments Make an on-one-time bill payment Monitor energy usage View current electric plan details Manage contact details, like email addresses or phone numbers If you're currently a Payless Power customer and have your Payless Power account number ready (along with your email address and billing zip code), register with Payless Power MyAccount to have on-the-go access! Payless Power has yet to develop a Payless Power app, but the Payless Power login portal is made in a mobile-friendly format as well. Payless Power outage : Phone numbers As a provider, Payless Power handles billing, new customer set ups, and transferring or ending service for current customers. In the event of an outage, customers must contact the utility company that services the area (since they are responsible for maintaining and repairing the electrical infrastructure) instead of Payless Power. Find out "Which utility company is mine?" if your power goes out or, if you already know, use the respective power outage number to report it: Oncor power outage: 1-888-313-4747 CenterPoint power outage: 1-800-332-7143 TNMP power outage: 1-888-866-7456 AEP Texas power outage (North & Central): 1-866-223-8508 Need to contact Payless Power customer service to start service, ask a billing question or setup service? Here are a few Payless Power phone numbers to call: Payless Power phone numbers : Customer service in Texas Department/Reason Phone Number Hours (Central) Payless Power Customer Service English & español 1-833-926-9750 M-F : 8am-6pm Sat : 9am-5pm New Sign-Up, Customer Service English & español 1-833-926-9750 M-F : 8am-7pm Sat : 9am-5pm Bill payment 1-866-963-9353 24/7 (automated) Payless Power power outage: CenterPoint: Oncor: TNMP: AEP Texas: Contact for utility company: 1-800-332-7143 1-888-313-4747 1-888-866-7456 1-866-223-8508 24/7 Alternative ways for Texas customers to contact Payless Power customer service : Email Payless Power customer service : Mail a letter to the Payless Power address : Payless Power P.O. Try the MoneyGram payment location finder depends on locale What does Texas think? : Payless Power reviews & complaints The statistical record of formal complaints filed by consumers against electric providers is managed by the Public Utilities Commission (PUC) of Texas. Over the last 6 months, Payless Power decently ranks as #32 on the list of the most formal complaints received against retail electric providers in Texas out of the 70+ registered REPs. While most customers appreciate the limited range of Payless Power electric plans offered and their competitive rates, a handful of unsatisfied customers (60%) have found issues with billing. Even though Payless Power's billing department has received the most complaints, in the grand scheme, they're still keeping their customers happier than a majority of other electric providers. Did you know...!? In Texas, 70% of formally filed complaints are specifically focused on billing practices by electric providers! Researching your next electric provider? Stay informed and check out the PUCT's Customer Complaint Statistics page before signing up to a plan. There are Payless Power customer reviews in several forums, but the leading websites are currently giving Payless Power: Payless Power electricity rates & plans All retail electric utility service areas in Texas are covered by Payless Power electricity plans, with an identical product offering (plans & rates!) across all deregulated utility companies. Check out what's offered below: Payless Power electric plans offered in Texas Oncor Electric Delivery AEP Texas Central AEP Texas North Texas-New Mexico Power CenterPoint Energy SmartTricity Premier 12 SmarTricity Easy Choice Fixed plans : Payless Power rates The Payless Power SmarTricity Premier 12 plan This Payless Power plan has a fixed rate that does not change over the contract term. However, the utility company's rate is subject to change between 2 to 3 times per year. So the plan's fixed rate is fixed but only to a certain extent. Generally, fixed rate plans are a good idea if you are able to lock-in a good rate at the right time of year. Once the fixed rate contract is finished, unless renewed or terminated, customers are automatically switched to a variable rate, month-to-month plan - a typical action taken by most (if not, all) electric providers. Retail electricity customers should choose a fixed rate contract of at least 12 months. Electricity prices per kilowatt-hour change throughout the year, and you may actually miss out on pricing when energy rates are low. However, because electricity rates tend to increase over time, sticking with fixed rates for longer periods may prove to be financially advantageous. Some electric providers design (and offer) an all-costs-involved electric plan that essentially combines the supply & delivery charges (provider and utility fees) into a single-charge plan. Payless Power, unfortunately, does not currently offer this type of plan product. Payless Power cancellation : Early termination fees If considering Payless Power as your next electric provider, it's worth noting the "Early Termination Fee" that is attached to this fixed rate electric plan. 12 months : \$40 Variable rates : Payless Power rates The Payless Power SmarTricity Easy Choice plan A variable rate is an energy price (in €/kWh) that will likely change each month. A variable rate can be at the discretion of the electric providers that offer such plans, or they can set rules on the rate's variability - for instance, the variable energy rate changes alongside the wholesale price of energy. The BEST thing about a variable rate plan is its ability to leave the plan and/or provider at any time without having to pay an "Early Cancellation Fee". Since providers are aware of variable rate-plan freedom, the energy price given in a variable rate plan is almost always higher than any fixed rate plan that the same provider will offer. Renewable energy : Payless Power electric plans Payless Power does not currently offer renewable energy plans/options The non-renewable energy plans offered by Payless Power source 20% renewable content (the Texas average is 21%). Payless Power's 20% contribution level is notably high for a non-renewable energy plan, compared to other non-renewable energy plans on the market in Texas. Payless Power plans : Minimum usage fees Payless Power does not implement minimum usage fees in their plans Plans which contain a minimum usage fee add an additional fee if a minimum level of energy usage is not met. Generally, plans that have a minimum usage fee tend to not favor energy-conserving consumers or smaller households. Besides the standard energy rate, any other "supply fee" (what electric providers charge their customers) is optionally imposed on customers. Many providers choose to charge customers these frivolous fees so as to discourage trying to save money by using less energy. The Payless Power plans available are designed to favor low energy consuming households. Payless Power does not use issue billing usage credits in their plans Big providers like Reliant Energy, TXU Energy, and Ambit Energy, use billing credits to promote higher levels of energy consumption of over a certain amount. Fortunately, with Payless Power, customers can be more conservative with energy consumption and will be billed a proportional amount for the reduced kWh use - Makes sense! Similar to the minimum usage fee strategy, the plans that contain the billing-credit feature are targeted to benefit households that have an average-to-high monthly energy usage. The hassle with plans that implement additional charges or credits based on monthly energy consumption, is that customers on such plans should monitor monthly usage to get their best-priced, final monthly bill. Base Charges with Payless Power The Payless Power SmarTricity Easy Choice plan The Payless Power SmarTricity Premier 12 plan Both Payless Power plans contain daily base charge fees. The base fee / based charge is another optional charge that providers often choose to impose on customers. The charge appears to be consistent across Texas at \$2.67 each day (\$82.77 for 31 days), pre-tax. This charge is on top of a relatively high energy rate charge, and the TDSP's "Delivery charges". Some electric providers -like TXU Energy and Reliant Energy- charge base fees on their plans, but there are many other electric providers (like Varsity Energy!) that also do not add the charge. Payless Power electric Prepaid plans The Payless Power SmarTricity Easy Choice plan The Payless Power SmarTricity Premier 12 plan Prepaid plans work exactly as they're called: Customers pay before consuming electricity and must keep a positive balance on their account in order to keep the lights on. In the case of the plans above, the SmarTricity Premier 12 & SmarTricity Easy Choice require service-starting payments of \$75 & \$49 (respectively) - which are then put toward energy consumption charges. Prepaid plans are GREAT since they don't require a deposit to start up (= no credit check!). Want a provider & plan that's less promotional and more straightforward? Try our FREE service. Their entrepreneurial journey was sparked by their grandfather's legacy, who started Samsill Plastics from his garage. In 2005, recognizing a vital need in their communities, the Young brothers established Payless Power. Their mission is to provide affordable and reliable electricity to underserved Texas customers, ensuring everyone has access to essential energy services. As a prepaid retail electric provider (REP), Payless Power caters to individuals with limited or challenging credit histories. Based in Fort Worth, we proudly serve over 400 residential communities across Texas while also offering commercial electricity plans through our partnership with Utility Choice. Since Texas deregulated its energy market in 1995, independent companies like ours have been committed to delivering competitive electricity options. We understand the significance of family and small businesses in Texas and strive to keep people connected with affordable energy solutions. Thank you for being part of our journey as we continue to empower Texans with reliable electricity. Together, we can make a difference in our communities!
