I can't believe I've been teaching for almost 11 years and just recently discovered education.com! Boy have I been missing out! This site is a teacher's paradise! Not only do they have over 20,000 worksheets available for download...check out every thing else they offer! Over 350 Interactive Games You can even download and print Workbooks! The hands-on activity section is one of my favorites and with over 3,500 activities to choose from, there's sure to be something for everyone. Over 1,300 Lesson Plans! Nearly 400 exercise downloads to give your students additional practice! And the songs...I LOVE the songs! Quickly pull up a song to help your students learn any concept. There's even over 70 interactive stories! Can it get any better?! Yes it can!!!! If you follow The Bender Bunch, then you know...WE LOVE SCIENCE! Just look at these Science experiments! Just this section alone is a Science teacher's paradise, with nearly 1,700 experiments to choose from! There's also educational and parenting articles and navigating the site is super user-friendly. You'll need to create a free account to use Education.com and you can do that here. The free basic membership gives you unlimited access to the Science projects and educational articles, but limits your monthly access to the other resources. Every month your allowed downloads is reset though. So if you'll only be using the Science or needing just a couple activities a month, the basic membership will be perfect for you. However, if you want unlimited access and want to get your hands on all of these fabulous resources any time you want, you can upgrade to a premium membership. Get all the worksheets, workbooks, interactive activities, lesson plans, exercises, songs, and stories you want and need, any time you need them, and in one place with the premium membership. It is sooooo worth it! I also like that if you're only interested in the workbooks, you can purchase the workbooks for \$4.99 each without having to upgrade to a premium membership. So there's lots of great options to fit everyone's needs. Education.com granted me permission to share a sample activity from the activity section on their site with you. I think I'm going to use it for our Multicultural Family Art Night at school this year. It would also be a great activity for teaching feelings and emotions. I love that for our special needs kiddos, there is no wrong or right when it comes to expressing yourself through art. Sample Activity: Create a Cubist Self-Portrait Is your child a budding artist? Support his creative nature by helping him to learn about art styles, and work on art process explorations. The cubist movement began in the twentieth century with the creation of abstract, broken up works of art. Translate this into a fun activity for young students by encouraging cubism-inspired art made at home.The cubist collage self-portrait activity will help your child to better observe, analyze, and reconstruct his own imaginative thoughts. Additionally, it reinforces basic math skills such as geometry. It promotes self-awareness, and can even help build aesthetic awareness. Moreover, he'll learn a little art history while he's at it!What You Need: Construction paper (at least two pieces) Pencil Scissors Crayons, oil pastels, or markers Mirror What You Do: Ask your child to take a look in the mirror. What does he see? How does the face change with each expression of emotion he makes? Now it's time for your child to create a pencil drawn self-portrait. This can be a close up of just the face, neck, and shoulders or a full length portrait. Have your child color in the pencil self-portrait with crayons or markers. For added fun, try oil pastels. Using these soft, crayons-like utensils is a great way to introduce your child to different artistic tools. After the self-portrait is finished, have your child cut the drawing into pieces that form geometric shapes. Make sure that the pieces are not too small. Have your child rearrange and reassemble the cut-out shapes of his portrait. Then, have him glue them down on a blank sheet of construction paper. He should rearrange them in a way that makes a completely new abstract portrait. Let his imagination run wild! There are no limits to the ways in which he styles his composition. Enjoy your child's abstract cubist collage! Try extending this project by asking your child to create several self-portrait collages. Each work of art can be varied by altering the facial gestures, their arrangement, and even the colors used. Ask your child to choose colors that connect with the emotion in the drawing. For example, a sad picture may be blue while a happy portrait could be bright yellow. Which resource categories are you most excited about? Check out all the categories on your education.com tour here. Do you feel difficulty in helping your child to finish the homework? If yes then we will help you out to solve your problem. This page will help your elementary school child to develop the math skills which is needed to succeed in the classroom.
