As Evereve thought about what's important to the company as well as their moms, it was clear that both want to hand down a better environment to our children. Thus began the search for more sustainable water options. While Sarahs group had done a lot of work in the past around water and wastewater technical assistance, the idea of delivering safe water through bottle filling stations was a whole new thing. After spending more than \$85,000 per year on water, plus additional costs to store water bottles, one well-known American manufacturing company knew they needed to make a change. With exponential costs spent on water, plastic bottle waste piling up, and employees lacking easy access to water, the company turned to Elkay for help. By partnering with Elkay, they were able to provide their employees with proper, continuous hydration while saving money. In this case study, discover how they:Saved over \$100,000 by installing award-winning bottle filling stationsEliminated plastic waste by encouraging employees to use reusable cupsProvided their employees with easy access to water Download Wellborn Case Study Bottles ofwater served ...without the plastic: All ezH2O bottle filling stations are customizable with university- or company-specific logos.
