Our extensive list of tests and packages ensures that you can find the right option for accurate diagnosis, monitoring, and preventive care. Document delivery via email, mail, or fax Clinical Pathology Laboratories is a full-service laboratory led by a team of pathologists with over 2400 staff members dedicated to developing and supporting best-in-class clinical and anatomical pathology services. Across the country and within individual communities, we support the full continuum of care by connecting the dots and creating communication and efficiencies between the laboratory and our providers. Clinical Pathology Laboratories (CPL) has more than 200 locations across Texas, New Mexico, Oklahoma, Louisiana, Florida, Georgia and Nevada to serve you. Find a Patient Service Center near you. Or for a city-by-city listing, please visit the state-specific listings to the left of this map. Our aim is to provide the most current testing. This test list is a work in progress and will be updated periodically. For additional information, or with questions about tests which are not included on this list, please contact our client services department, or contact your local Sales representative. Web-Based Laboratory Ordering and Results Platform A secure, high-performance, patient-centric platform that enables providers to order and receive results online. Easy to use, HIPAA compliant, and secured through SSL encryption protection. Installed and maintained by Sonic Healthcare USA support staff. Our systems have significant interface capability with any EMR or EHR system for laboratory orders and patient results. Interfaces are designed to use standard HL7 or custom/proprietary formats, which are required to integrate with any system. Sonic MyAccess™ is a web-based platform and HIPAA-compliant solution for your patients to access and understand their lab results. The online application allows patients to safely and simply view their test results while providing additional access to supplemental resources such as interactive graphs and educational content. Scheduling for lab services Our appointment scheduling system provides a convenient way for patients to book appointments at our Patient Service Centers from their computer, tablet or smartphone. SOC 2 is an auditing procedure ensuring that service providers securely manage data to protect the interest and privacy of customers. Women's Health Test Menu with Screening Recommendations (ThinPrep®, Aptima Swabs, Urine, Bactiswab) The clinician must determine the use and relevance of the results of these tests when ordering outside of these parameters. Only minimal ThinPrep® approved lubricants should be used during collection. CDC recommendations for STIs: SCREENING 4 TREATMENT Provider Education: STI Treatment Guidelines Quick Chart STI Treatment Guidelines Clinician Pocket reference STI Treatment Guidelines Clinician Full reference Patient Education (CDC): STD Patient Education Resources ThinPrep® liquid based Cytology 33717-0 HPV High Risk with 16, 18/45 Genotyping 49896-4 FDA approved cervical screening with Aptima HPV test: women ages 21 years and older = Pap, reflex to Aptima HPV if ASC-US women ages 30 years and older (ACOG limits age to 65) = Pap + Aptima HPV †Chlamydia trachomatis (CT) and Neisseria gonorrhoeae (GC) via Aptima Combo 2 TMA Assay 64017-7 †Trichomonas Vaginalis (Aptima TMA) 46154-1 Vaginitis: CV/TV 62460-1 BV 69568-4 Mycoplasma Genitalium 69935-5 HSV 1 & 2 (Orange Multitest swab of anogenital lesion) 80354-4 †CPA can only accept these specimens if the client is NOT currently using Hendrick Regional Lab for these tests. This does not apply if testing off a ThinPrep specimen. Locate your nearest Patient Service Center from over 50 locations.
