Expert Verified Acetylene is a colorless gas that is often used in welding and cutting processes due to its ability to burn at high temperatures. However, it is highly flammable and can be explosive when mixed with air or oxygen. Therefore, the statement that acetylene gas is not explosive is incorrect, as acetylene has the potential to be quite explosive under certain conditions. Course: SP2 Automotive Service Safety Activity; Module 20; Final Exam Status: Completed on 9/15/2023, 8:46:36 PM Previous Activity Return to Summary Acetylene gas is not explosive. True False 7 of 25 Match the following types of malnutrition with their primary characteristics. I. Undernutrition II. Overnutrition III. Malnutrition A. Excessive nutrient and energy intake B. Lack of nutrients and insufficient energy supply C. Not receiving proper nutrition, either too many or too few nutrients 1. B, II. A, III. C b. 1. C, II. B, III. A c. 1. A, II. B, III. C d. 1. B, II. C, III. A A neonatologist treats children from birth to 18 years of age. True False a 14-year-old male patient was injured while skateboarding. The injuries included a displaced transverse fracture of the right femur, half with multiple significant abrasions of the right thigh. What ICD-10-CM codes are reported? S72.91XA, S70.311A, V00.138AS72.321A, V00.138A, Y93.5172.32 A, S70.311A, V00.1384, Y93.5172.9XA, S70.311A, Y93.51D Check my answer 26/58 Which of the following is a potential consequence of long-term vaping? Better cardiovascular health Enhance immune system Improved lung function Increased risk of lung injuries Socrete Questions Glow cannurses ensure that diagnostic testing for integumentary concerns leads to timely and appropriate follow-up care especially when patients face barriers like fear, health literacy, or access issues? Name: 94. Antibiotics fight infections by a. preventing viruses from replicating. b. growing green mold that inhibits bacterial growth. c. killing bacteria. d. killing infected cells. 95. The inflammatory response can cause a. killer T cells to attack infected cells. b. permanent immunity. c. antibodies to bind to antigens. d. pain, swelling, and fever. 96. Unlike in passive immunity, in active immunity antibodies are produced by a. your own body. b. other animals. c. an autoimmune disease. d. the mother of an infant. 97. Humoral immunity is carried out by a. antibodies. b. macrophages. c. lymphocytes. d. killer T cells. 98. Asthma is an example of a. the immune system's attacking its own body cells. b. cancer. c. the immune system's overreacting to an antigen. d. an autoimmune disease. 99. All of the following are ways that HIV can be spread EXCEPT a. sharing needles for intravenous drug use. b. engaging in sexual activity. c. tending to another person's bleeding wound when you have a cut on your hand. d. using another person's hairbrush. 100. Cancer cells affect other cells in the body by a. forming benign tumors throughout the body. b. increasing nerve connections. c. taking in nutrients needed by other cells. d. all of the above. ID: B You are on the scene of a 65-year-old female patient in cardiac arrest. CPR is in progress and the AED has been applied. The AED advises shock. After defibrillating the patient, what is your next intervention? A. Check for a pulse. B. Place in the recovery position. C. Continue CPR. D. Insert a Combitube. 14. The type of lens used to correct for presbyopia is a. minus Diverging lens A Sphero-cylinder lens A plus Converging lens A bifocal, trifocal, progressive or a single vision lens Normal blood contains 5,000 to blank WBCs per cubic milliliter. 10,007,00015,00012,000 What does the suffix in the word nephropathy mean?
