Edward Currie ISBN: 9781844804511 Please email us with your comments on this book. Aimed at students learning how to program for the first time, this is a focused introduction which stands out as an accessible first encounter with Java. Students work their way through carefully chosen examples and exercises - paced and structured for an intuitive progression. These drills will provide them with a sound and working knowledge of basic programming constructs. Taking an "objects later" approach, this book is designed for one semester courses with the aim of providing a launch pad to later in depth OOP study. Concepts and principles are illustrated by everyday analogies and backed up by code examples which will help to clarify and anchor your understanding. Developed with support from Global Campus and Middlesex University Press. Edward Currie ISBN: 9781844804511 Text files of Java programming chapter by chapter. Download a pdf file featuring sample projects for you to research and complete. Interactive multiple choice questions for you to test yourself. Ask the publishers to restore access to 500,000+ books.
