Argo libri di testo

L'aggiornamento del programma libri di testo per l'anno scolastico 2020/21 sarà disponibile sul sito per le scuole che hanno rinnovato il contratto con Argo Software. Per le scuole senza contratto, è possibile scaricare il contratto o rivolgersi alla rete commerciale di Argo. I testi da adottare vengono prelevati dal catalogo generale dell'A.I.E., che detiene la proprietà esclusiva dei testi. Contemporary adoptions for class or book purposes can be reprocessed and updated as needed in another class, avoiding the duplication of similar data. Conversely, adoptions from one empty class can be taken from existing adoptions in a similar class. After specifying the adoptions, the program automatically handles all subsequent requirements, including those related to school information: compilation and printing of adoption models for internal use, compilation and printing of models for librarians, and compilation and printing of summary cost tables by class and for the entire institution. Additionally, the program provides an index of adoptable books and enables the creation of AI models for Anagrafica school Adoptions Quadro delle classi. After completing the tasks, the program allows for the sending of files with a standard track defined by A.I.E. via email. The program is designed to generate an email with attachments that can be sent automatically to A.I.E. (if the same computer is connected to email services). It is also possible to transfer adoptions to Argo Alunni Web for printing library cards. ****System Requirements**** The Argo software distributed in SaaS mode uses the latest web technologies and can be used on any device with a browser capable of interpreting JavaScript correctly. However, to fully utilize the high level of usability equivalent to that of a traditional Windows application in client-server architecture, it is recommended to use hardware with the following minimum characteristics: Atom N270 1.6 GHz CPU, 1 GB free RAM, screen resolution >= 1024x768 pixels. ****Compatible Systems**** The software is compatible with: * Microsoft Windows XP or higher * Apple Mac OS X >= 10.5 * GNU/Linux distribution with kernel >= 2.6 ****Browser Requirements**** A browser that supports the following features is required: * Mozilla Firefox >= version 10 * Google Chrome >= version 30 ****Network Requirements**** The software requires a connection with the following characteristics: * Adsl with guaranteed bandwidth: >= 256 Kbps (for 10 users) * Network latency: < 50ms and = 1920x1080 pixels Note that some applications may require the presence of Java runtime environment. For Windows-based programs, it is necessary to use Sybase SQL Anywhere version 8.0.2 or higher on 64-bit systems. Although this version is not officially supported by operating systems after Windows 2003, we have not experienced any issues with functionality. On 64-bit systems, it is essential to install Sybase as an administrator and run the program "Sybase Central" and "Argo Configuratore connessioni database" as an administrator. Regarding textbook adoption for the 2024-2025 academic year, teachers are informed that this process will take place through the ARGO portal using their own access credentials. Teachers who serve as representatives of their subject area groups (GD) must share the new book selections on the GD's classroom page by April 23rd at the latest. For the 2024-2025 academic year, the following textbook adoptions are specified: * 1st A and B ITE: Spanish language * 1st C ITE: French language * 2nd A and B: Spanish language * 2nd C: French language * 3rd AFM: Spanish language * 3rd BFM: French language * 3rd SIA: Spanish/French language * 3rd TUR: Spanish/French language with third language (French/German/Spanish) * 4th AFM: French/Spanish language * 4th BFM: Spanish language * 4th TUR: Spanish/French language with third language (Spanish/German/French) Class coordinators must ensure that all subjects are listed in the adopted book list, which can be viewed on the "stamps" section of the portal. If any subjects are missing, the coordinator must notify the educational secretariat. Once verified, the coordinator will download and upload the book list in PDF format to the ARGO classroom bulletin board by May 3rd (with only teacher recipients). Each teacher must verify the accuracy of the data entered for each textbook (ISBN, new adoption, etc.) and confirm their acceptance by May 8th at the latest.
