

[Click to verify](#)

A niece is the daughter of one's brother or sister, and in some cases, the daughter of a husband's sibling. This relationship can be complex, with multiple names and terms used to describe it. In English, the term "niece" refers specifically to the daughter of one's brother or sister. If the sibling is on the mother's side, the niece is called an aunt-niece, while if the sibling is on the father's side, she is referred to as a uncle-niece. In Chinese culture, the relationship between siblings and their nieces and nephews is also complex. The term "niece" can refer to both the daughter of one's brother or sister, as well as the daughter of one's husband's sibling. In some cases, the niece may be referred to by a different name, such as "外甥女" (wài shēng nǚ) for the daughter of one's husband's sibling. In addition to these terms, there are also other words and phrases used to describe the relationship between siblings and their nieces and nephews. For example, in English, the term "great-niece" refers specifically to the daughter of one's niece or nephew. In Chinese culture, the term "侄孙女" (zhī sūn nǚ) is used to refer to the granddaughter of one's brother or sister. Overall, the relationship between siblings and their nieces and nephews can be complex, with multiple terms and names used to describe it. However, understanding these different relationships is essential for building strong family bonds and navigating complex social situations.
